Professional Summary

Data Analyst – Capgemini Pvt Ltd.

Dec 2021 – Sep 2024

- Performed data cleaning and transformation processes using SQL, Python, and Advanced Excel, improving data quality and enabling accurate analysis.
- Built and deployed data models using Power BI Desktop and Power BI Service, integrating data from diverse sources for comprehensive business reporting.
- Designed and optimized complex SQL queries for data extraction, transformation, and loading (ETL) across multiple relational databases, ensuring data integrity and performance efficiency.
- Developed and maintained interactive Power BI dashboards for data visualization, leveraging advanced features such as DAX and Power Query (M-Query) to create dynamic, data-driven reports.
- Collaborated with cross-functional teams to identify data requirements and support business initiatives, showcasing a proactive approach to problem-solving.
- Presented findings and strategic recommendations to stakeholders and senior management, effectively translating technical data into actionable insights.
- Received recognition for implementing data solutions that improved monthly report generation by 25%.

Analyst - IMS Analytics Services

Jun 2021 – Dec 2021

- Assisted in the collection, cleaning, and pre-processing of large datasets related to customer behavior and product sales.
- Conducted exploratory data analysis (EDA) to uncover sales trends and identify customer preferences, leading to data-driven marketing strategies.
- Collaborated with the marketing and sales teams to design interactive dashboards using Power BI to visualize key performance indicators (KPIs), product performance, and conversion rates.
- Participated in cross-functional meetings to present analytical findings and recommend data-backed strategies for improving user experience and sales.

Education

Bachelors Of Engineering | Computer Science Engineering

May 2017 - Aug 2021

Rajiv Gandhi Institute of Technology , Bengaluru ,India.
